NileTheme.SLD
Overview:

Changing themes and visual style is a nice addition to XP that you can also take advantage of in XPe. The Nile theme available for download from Microsoft (http://www.microsoft.com/downloads/details.aspx?FamilyID=837a8287-2a40-4140-8be7-751aa26b40bd&DisplayLang=en) provides a different desktop background, some icons, and sounds. The NileTheme.sld contains a sample component for the Nile theme. The component is dependent on the Explorer shell and Display Control Panel components. The theme must setup post-FBA via the Display Control Panel applet. A sound card and sound components are required to play the custom sounds.

Instructions:

1. On your development machine**, download** the ZIP file containing the SLD.
2. **Extract** the contents of ZIP file to your hard drive.
3. Create a new directory in the same directory as the SLD called **Files.**
4. **Download** the Nile_Theme_EN.msi from the Microsoft website.
5. Use Virtual PC or another PC to **install and extract** the files.
6. Using the SLD file resource a guide, **copy** the extracted solution files listed above to the **Files** directory. The Repository path is relative to the SLD. The Repository has been setup so the files are one directory level below the SLD.
7. **Import** the SLD into the XPe data base using Component Database Manager.
